MATURITY PROFILE

FUND CREDIT QUALITY

Investors are advised to read and understand the contents of the Explanatory Memorandum before investing. Among others, investors should consider the fees and the charges involved.

Sashika Wickramaratne
Fund Manager

Private sector credit growth marginally dropped down to 20% in April 2017 from 21% in December 2016. Borrowings from state owned enterprises grew by 9% in April. Higher SOE borrowings resulted from rising oil prices and higher oil consumption due to lower hydro power generation as a result of the drought situation in the country.

However based on the recent published data, thermal power generation has dropped to 91% in March 2017 to 77% in July and the WTI oil prices has dropped to \$46.55 from \$53.08 in April. Hence we believe the SOE borrowings will ease off in the next quarter.

Gross Official Reserves in May increased to USD 6.7Bn from USD 5.0Bn in April 2017 following the USD 1.5 billion sovereign bond issue and the USD 285 million SLDB (Sri Lanka Development Bond) issue. The foreign loan repayments of USD 4.1 billion are due over the next 11 months period. Under the current global situation it is favorable for Sri Lanka to mobilize foreign funds. Against this backdrop we feel that there is approximately 60% chance for rates to remain at current levels this year and around 40% chance for rates to come down conditional upon a sale of a state own asset to a foreign party.

ASSET ALLOCATION

Fixed Deposits	45.32%
Commercial Papers	48.09%
Securitization	3.20%
Government Securities	3.39%

ABOUT THE FUND

Guardian Acuity Money Market Fund is an open ended unit trust which invests in a portfolio of investment grade securities that are maturing within 365 days.
